

ABSTRACT OF THE DISCLOSURE

A cover system for covering a cargo area of a vehicle. The
5 cover system includes an elongate track assembly and a cover
assembly. The track assembly is mountable to an upper surface of a
pair of sidewalls of a vehicle and the cover assembly is retractably
mounted to the track assembly. At least one drive assembly is
mounted to the cover assembly for retractably moving the cover
10 assembly between first and second positions.
